

PLOTMASTER HEADLINES-JANUARY 2010

Blaine Burley, (President of Plotmaster Systems, Ltd.) planted this diverse blend of seed in a single pass using a ATV and the Plotmaster Hunter 400 Electric unit with PSL's New **VERSA-SEEDER™ System**.

These plots which were planted in Sept. 2009 contained Forage Oats, Brassicas, Wheat, Ebony Peas, Winter Peas, Alfalfa, Yucca-Arrowleaf Clover and Chicory.

This is a great seed blend for sandy, well-drained soils. Going approximately 8 mph, Burley planted over 5 acres of food plots in less than 2.5 hrs.

The **PLOTMASTER™** is the perfect wildlife management tool for today's sportsmen and land managers who want to plant food plots and manage their recreational properties effectively. Because of its compact design, it is ideal for planting food plots in a variety of settings, including rough hard-to-get-to places such as firebreaks, utility right-of-ways, and small forest openings. Its compact design also allows you to reach remote, isolated areas without damaging trees and/or your equipment.

Plotmaster Systems, Ltd. has added many new, innovative features to the new, improved **PLOTMASTER™ Hunter Series**. For example, each of these new units is equipped with PLOTMASTER's new, patent-pending **VERSA-SEEDER™ system**. This new reverse auger-brush seeder system will plant virtually any type of seed with ease including grass seeds and hard-to-plant seed blends. Therefore, these units are perfect for small/hobby farming, landscaping as well as planting food plots and garden plots.

"The appeal of the new **PLOTMASTER™ Hunter Series** will be their versatility, durability, and affordability," shares Blaine Burley. "They're versatile in that they will perform several functions at once, thus saving time, energy and money for today's land managers. Plotmaster Systems, Ltd is headquartered at 111 Industrial Blvd., Wrightsville, GA, 31096.

For more information about the **PLOTMASTER™** or other **Plotmaster Systems, Ltd.** products, please call 888-MAX-GAME or visit www.theplotmaster.com.

Brock Burley (age 8) harvested his first deer (pictured left) on a small 1/2 acre plot in Alabama on 1/30/2010.
